EDUCATION

VIT Bhopal University

B.Tech in Computer Science (Specialization in AI) | **CGPA: 8.54**

Sep 2023 - Present

Bhopal, MP

WORK & EXPERIENCE

Founder & Lead Developer

Fullventory AI (<https://fullventory-ai.onrender.com/>)

Feb 2026 - May 2026

Remote

- Created a proprietary Demand Forecasting Engine using Random Forest Regression to analyze 2,00,000 historical sales records for predictive inventory management.
- Designed a Cloud-Native Architecture utilizing Supabase with transaction pooling (PgBouncer) to ensure real-time data consistency and 80% faster batch-sync processing.
- Implemented an autonomous fulfillment pipeline via Resend API, automating supplier purchase orders based on AI-calculated "Days-to-Zero" inventory thresholds.

IT Intern (Business Analyst)

Honda Cars India Ltd.

May 2025 - Jun 2025

Tapukara, Rajasthan

- Spearheaded system enhancements for Honda's QC platform using SAP while ensuring 100% audit compliance.
- Connected the IT team and factory operations through regular syncs to align on project requirements and feedback, ensuring a smooth platform rollout.
- Managed end-to-end asset tracking for over 20 hosts using Symphony Submit, maintaining 100% data accuracy.

PROJECTS

Alzheimer's Detection | PyTorch, Transformers, ResNet34, BBO | Research Paper Link

Oct 2025 - Jan 2026

- Applied advanced Computer Vision techniques to develop a Deep Temporal Transformer (DTT) architecture for 32-timestep MRI sequences, leveraging a ResNet34 backbone for spatial feature extraction.
- Engineered a custom Brown Bear Optimization (BBO) algorithm to automate hyperparameter tuning, optimizing the architecture for 93% accuracy in dementia classification.
- Collaborated with a team of 6 to design and implement a robust medical validation pipeline using Stratified K-Fold Cross-Validation, ensuring high model generalizability and rigorous evaluation compliance for clinical datasets.

Hybrid Book Recommendation System | Python, Scikit-Learn, SciPy, Flask

Aug 2025 - Sep 2025

- Built a hybrid recommendation engine utilizing a consensus-based approach combining KNN, Cosine, Jaccard, and Pearson Correlation.
- Developed a "Consensus Rank" algorithm to aggregate multi-model outputs, improving relevance by 5% across sparse datasets.
- Evaluated system performance against standalone models, demonstrating a measurable reduction in prediction error and a 15% improvement in processing latency through optimized vector operations.

TECHNICAL SKILLS

Programming Languages: Python, Cpp, SQL

Libraries/Frameworks: Scikit-learn, PyTorch, Pandas, NumPy, Flask, OpenCV

Developer Tools & Software: Git, GitHub, SAP, Supabase, Resend

EXTRA CURRICULAR & ACHIEVEMENTS

National Service Scheme (NSS)

Apr 2024 - May 2026

- Awarded NSS 'B' Certificate by the Ministry of Youth Affairs and Sports, Government of India, for completing 240 hours of community service and a 7-day special camp.
- Led a team of 30 volunteers to organize 25 community development initiatives, and managing end-to-end logistics for university events with 500 attendees.

CERTIFICATIONS

AWS Certified AI Practitioner

July 2026

Applied Machine Learning (U-Michigan)

Jan 2026
